

Independence Day Disposal Service Reminder

B.C. Waste Free observes four holidays each year:

- New Year's Day
- Christmas
- Thanksgiving
- Independence Day

B.C. Waste Free will be **closed** on **Tuesday, July 4th**. Please see the table below for more information regarding waste disposal services over the Independence Day Holiday:

Date	Trash Collection		Landfill Office	Residential Drop-Off Area
	Residential	Commercial		
Saturday, July 1	No	Yes	Open (7am-3pm)	Open (7am-8pm)
Sunday, July 2	None	None	Closed	Open (7am-8pm)
Monday, July 3	Yes	Yes	Open (7am-3pm)	Open (7am-5pm)
Tuesday, July 4	None	None	Closed	Closed
Wednesday, July 5	Yes	Yes	Open (7am-3pm)	Open (7am-5pm)
Thursday, July 6	Yes	Yes	Open (7am-3pm)	Open (7am-8pm)
Friday, July 7	Yes	Yes	Open (7am-3pm)	Open (7am-8pm)

Residential customers may deposit waste for free at the Residential Drop-Off Area. Please be sure to have your valid Nevada Driver's License with a Boulder City street address and vehicle registration. If you do not yet have a license with a Boulder City street address you must show your current driver's license along with your current Boulder City Utility Bill.

Recycling is important because it saves space in our City-owned landfill. The landfill lifespan is extended and the footprint minimized when recyclables are diverted. Recycling conserves natural resources such as timber, water and minerals that would otherwise need to be extracted from the earth. The City, in partnership with B.C. Waste Free, offers a comingled recycling program. Clean recyclables do not need to be sorted before being placed in the green recycling container for residential collection. If you do not have a recycling container or have additional questions please visit www.bcwastefree.com or call (702) 293-2276.

Boulder City's Water Quality Report is Now Available!

CBC-NV-0617

The City of Boulder City believes it is essential to provide all of the facts about Southern Nevada's drinking water to our customers. The Water Quality Report, which is issued annually, includes test results, a source water analysis, an overview of the treatment process and other valuable information relating to the quality of our municipal water supply. The 2017 Water Quality Report is published in accordance with the federal Safe Drinking Water Act which establishes drinking water standards and requires purveyors to provide water quality information to their customers.

The sources of drinking water include rivers, lakes, streams, ponds, reservoirs, springs and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals, and in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

This water may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. To ensure tap water is safe to drink, the EPA prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. Some people may be more vulnerable to contaminants in drinking water than the general population. Im-

muno-compromised persons should seek advice from their healthcare providers about drinking water.

In 2016, 18 regulated contaminants were detected in Boulder City's drinking water. However, these contaminants were all at allowable levels based on the Safe Drinking Water Act standards and no health violations were reported. Additionally, 5 unregulated contaminants were detected. Unregulated contaminant monitoring helps the U.S. Environmental Protection Agency (EPA) determine where certain contaminants occur and whether these contaminants should be regulated in the future.

Some customers choose to purchase water filtration devices to improve the aesthetics of their home drinking water. **All home water treatment devices require periodic maintenance.** The majority of water quality complaints received by the City are due to private equipment and private plumbing. To learn more about the pros and

cons of using home water treatment devices, please visit: https://www.snwa.com/wq/taste_home_filters.html.

Please visit <http://www.bcnv.org/280/Water-Quality-Consumer-Confidence-Report> to view the complete 2017 Water Quality Report and learn more about your drinking water. If you would like a paper copy mailed to your home, please email publicworks@bcnv.org or call (702)293-9200.

July City Council Meeting

In the month of July, there is only one City Council Meeting held.

This year, the meeting will be held Tuesday, July 11th at 7:00 pm.
