## WHAT IS THE LAND MANAGEMENT PROCESS?

The Ordinance that created the Land Management Process was first adopted in 2001. It was created in response to the many and varied requests by private citizens to either purchase or lease City-owned land. The intent of the new ordinance ("law") was to provide a formal public forum to receive public input at several public hearings before the City Council and Planning Commission to determine if the proposed disposition of City-owned land was in the best interest of the community. It also allows property owners in the vicinity of such proposals to provide valuable input into the process.
